JOURNAL OF
MODERN OPTICS

Board of Editors

P. L. Knight (Editor)	Optics Section, Blackett Laboratory, Imperial College, London SW7 2BZ, UK
R. W. Boyd (North American Editor)	The Institute of Optics, University of Rochester, Rochester, New York 14627, USA
G. S. Agarwal	Physical Research Laboratory, Ahmedabad
S. M. Barnett	University of Strathclyde, Glasgow, UK
K. Blow	BT Laboratories, Martlesham Heath, Ipswich, UK
K. Burnett	University of Oxford, UK
V. Buzek	Institute of Physics, Slovak Academy of Sciences, Bratislava, Slovakia
W. J. Firth	University of Strathclyde, Glasgow, UK
G. Indebetouw	Virginia Tech, Blacksburg, Virginia, USA
B. Marx	BM Associates, Radlett, Herts, UK
D. Maystre	Faculté des Sciences et Techniques de St Jérôme, Marseille, France
D. T. Pegg	Griffith University
F. Persico	University of Palermo, Palermo, Italy
J. G. Rarity	Defence Research Agency Electronics, Malvern, Worcs., UK
M. G. Raymer	University of Oregon, Eugene, OR, USA
D. Richardson	University of Southampton, Highfield, Southampton, UK
J. R. Sambles	University of Exeter, UK
R. S. Sirohi	Indian Institute of Technology, Madras
H. Walther	Max-Planck-Institut für Quantenoptik
E. Wolf	University of Rochester, Rochester, New York, USA
F. Wyrowski	University of Jena, Jena, Germany

CONTENTS OF VOLUME 45

No. 1 January 1998

Letters

- 1 **A note on conical diffraction from index-matched gratings**
M. Lester and R. A. Depine
- 5 **Phase conjugation of broad-band laser pulses in BaTiO_3**
M. B. Danailov, K. Diomande, P. Apai and R. Szipöcs
- 11 **Polarization oscillations of solitons in dissipative, elliptically birefringent optical fibres**
M. F. Mahmood
- 17 **Propagation of pulsed zeroth-order Bessel beams**
Z. Liu and D. Fan

Papers

- 23 **Stepwise phase modulation of atoms coupled to a quasi-continuum of states in a cavity**
I. Tittonen, S. Stenholm and I. Jex
- 35 **Elliptic polarization of the refracted wave in presence of inhibited reflection**
M. C. Simon, J. M. Simon, L. I. Perez and C. E. Vanney
- 45 **Effects of resonator's optical path fluctuation on the characteristics of a fibre-optic ring resonator**
Z. Hu and J. Qian
- 51 **Realization and theoretical limits of the spectral resolution in double Fourier interferometric imaging with an optical telescope array**
P. Zhao
- 69 **On-axis irradiance for spherically aberrated optical systems with obscured rectangular apertures: a study using the Wigner distribution function**
W. D. Furlan, G. Saavedra, E. Silvestre and M. Martínez-Corral
- 79 **Correlations in interference and diffraction**
L.-M. Duan and G.-C. Guo
- 91 **Effect of chirped laser pulse narrowing by reflection from a nonlinear DFB structure**
A. A. Afanas'ev, B. A. Samson and E. G. Tolkacheva
- 103 **Efficiency optimization for Cerenkov second harmonic generation in nonlinear planar waveguides**
R.-S. Chang and S.-Y. Shaw
- 117 **Anomalous correlation of intensity fluctuations in strong-scattering media**
S. Sangu, T. Okamoto and T. Asakura
- 133 **Rigorous analysis and optimization of subwavelength-structured binary dielectric beam deflector gratings**
M. Kuittinen, J. Turunen and P. Vahimaa

- 143 **Broad-band heat reflector design using five-layer symmetrical periods from non-absorbing high- and low-refractive-index materials**
M. Nenkov and T. Pencheva
- 153 **Reconfigurable interconnection using fixed regional angular volume holograms in photorefractive materials**
F. Wang, L. Liu, G. Li, B. Liu and Z. Wang
- 167 **Effect of particle size and shape on the free electron linear and nonlinear polarizabilities**
D. Truchado, G. Rojo and F. Agulló-Lopez
- 179 **Beam switching by nonlinear control of total internal reflection**
D. R. Rowland, W. Samir, R. A. Sammut and H. T. Tran
- 193 **Vector coherence theory for specular reflection of black-body radiation**
D. C. Bertilone
- 199 **Formulations of the extended boundary condition method for three-dimensional scattering using the method of discrete sources**
T. Wriedt and A. Doicu
- Short Contribution*
- 215 **The generation of phase singularities at millimetre wavelengths by the use of a blazed grating**
G. F. Brand

No. 2 February 1998

Letter

- 221 **Spectroscopic analogy approach in selective search for new Ce^{3+} -activated all-solid-state tunable ultraviolet laser materials**
M. A. Dubinskii, K. L. Schepler, V. V. Semashko, R. Yu. Abdulsabirov, S. L. Korableva and A. K. Naumov

Papers

- 227 **Annular binary filters for controlling the axial behaviour of optical systems**
T. Cichocki, M. Martínez-Corral, M. Kowalczyk and P. Andrés
- 239 **Focusing Gaussian beams by an annular lens with spherical aberration**
J. Pu
- 249 **Characteristic analysis of absorptive multiple-quantum-well optical waveguides**
C. Ma
- 257 **Second-harmonic generation in Ge-doped silica fibres: experiment and theory**
B. P. Antonyuk and V. B. Antonyuk
- 269 **The maximum mutual information without coding for binary quantum-state signals**
M. Osaki, O. Hirota and M. Ban
- 283 **Continuous photodetection of resonance fluorescence**
G. Nelson Jones and C. T. Lee

- 299 Modified conventional plane-wave scattering approach to estimate performance characteristics of laser particle-size analysers
V. I. Ovod, M. Stintz and E. Heidenreich
- 315 Stochastic wavefunction diagrams for electromagnetically induced transparency, inversionless gain and shelving
J. A. Vaccaro, A. V. Durrant, D. Richards, S. A. Hopkins, H. Chen and K. E. Hill
- 335 Achromatic birefringent grating polarizer
S. Liu, Y. Chen, S. Zheng, D. Li and R. Wang
- 343 Digital image decoding for in-line X-ray holography using two holograms
T. Xiao, H. Xu, Y. Zhang, J. Chen and Z. Xu
- 355 Mode-locked erbium-doped fibre ring laser using nonlinear polarization rotation
C.-W. Chang and S. Chi
- 363 First-order analysis of a three-lens zoom system with the last lens fixed
M.-S. Yeh, S.-G. Shiue and M.-H. Lu
- 377 Quantum theory of light in nonlinear media with dispersion and absorption
E. Schmidt, J. Jeffers, S. M. Barnett, L. Knöll and D.-G. Welsch
- 403 Second-order nonlinear optical signatures of surface chirality
M. Kauranen, T. Verbiest and A. Persoons
- 425 Electromagnetic concept of phase conjugation
Z. Bouchal and J. Peřina
- 437 Book reviews

No. 3 March 1998

Letter

- 441 The 'non-refractive effect' in translucent diffusers: a geometrical model
F. Perez Quintián, M. A. Rebollo, N. G. Gaggioli and C. A. Raffo

Topical reviews

- 449 Spectroscopy of strongly coupled atom-cavity systems: a topical review
G. S. Agarwal
- 471 Electromagnetically induced transparency
J. P. Marangos

Papers

- 505 The analysis of noise power spectrum induced by the semiconductor laser phase noise in fibre-optic interferometers considering optical fibre dispersion
X. Yu
- 515 Cylindrical wave diffraction by a perfectly conducting strip in a homogeneous bi-isotropic medium
S. Asghar, T. Hayat and B. Asghar

- 529 Signal level in a confocal scanning microscope using step-index optical fibres**
R. Gauderon and C. J. R. Sheppard
- 539 Partially coherent sources with helicoidal modes**
F. Gori, M. Santarsiero, R. Borghi and S. Vicalvi
- 555 Relationship between the critical points and the semiperiodic zones in scalar diffraction**
J. Ferré-Borrull, S. Bosch and S. Vallmitjana
- 573 Third-harmonic generation via laser-plasma interaction: beyond the low-density approximation**
H. S. Brandi and P. A. Maia Neto
- 587 On the relationship between the cross-spectral density and the Wigner distribution function**
R. Castañeda
- 595 Photon statistics of pulsed parametric light**
P. R. Tapster and J. G. Rarity
- 605 Multiple solutions provided by analytical synthesis in admittance matching; application to dichroic mirrors**
A. Dinca, P. T. Miclea, V. Lupei, T. Skettrup and M. Dinca
- 619 Stokes operators, angular momentum and radiation phase**
A. S. Shumovsky and O. E. Müstecaplıoğlu
- 629 Analytic theory of coherent cross-gain modulation in semiconductor travelling-wave amplifiers**
H. S. Fewes, D. George and M. McCall
- 639 Optical characterization of a complex grating profile**
R. A. Watts, J. R. Sambles and M. C. Hutley
- 653 Space-variant optical correlation by the use of random binary phase modulation**
R. K. Wang

No. 4 April 1998

Topical review

- 661 Fluorescence near interfaces: the role of photonic mode density**
W. L. Barnes

Un-topical review

- 701 Heisenberg's dog and quantum computing**
J. A. Bergou and B.-G. Englert

Papers

- 713 Squeezed displaced Fock states and non-diagonal P representation**
A.-S. F. Obada and G. M. Abd Al-Kader
- 735 Measurement of the power distribution during stimulated Brillouin scattering with focused Gaussian beams**
T. R. Moore, G. L. Fischer and R. W. Boyd

- 747 Imaging the field over a reflection phase grating by an apertureless photon scanning tunnelling microscope
D. A. Lapshin, V. I. Balykin and V. S. Letokhov
- 759 Decoherence as the process of generation of coherent states
S. M. Dutra
- 765 Low-coherence fibre heterodyne interferometer for both dc and high-frequency vibration measurements in the inner ear
E. Dalhoff, R. Gärtner, U. Hofbauer, H. Tiziani, H.-P. Zenner and A. W. Gummer
- 777 Interference in dielectrics and pseudo-measurements
T. A. Brun and S. M. Barnett
- 785 Symmetry of the field transmitted by metallic grids
A. Sentenac and D. Maystre
- 799 Coherence filters and their uses II. One-dimensional realizations
T. Shirai, E. Wolf, H. Chen and W. Wang
- 817 How to compute three-dimensional convolution and/or correlation optically: a mathematical foundation
Y. B. Karasik
- 825 Pulsed carrier out-of-plane speckle interferometry for transient vibration analysis
J. N. Petzing, A. Davila, D. Kerr and J. R. Tyrer
- 837 Copper-doped ion-exchanged waveguide characterization
F. Gonella, F. Caccavale, A. Quaranta and A. Sambo
- 847 Spectral noise analysis of single- and double-pass Er^{3+} -doped LiNbO_3 waveguide amplifiers
N. N. Puscas, R. Girardi, D. Scarano and I. Montrosset
- 861 Multiple wavelengths in oblique-incidence interferometer for rough-surface measurement using laser diodes
B. Franze and H. J. Tiziani
- 873 A note on the Kirchhoff formulation of diffraction by a plane screen
S. Ganci
- 877 Book reviews

No. 5 May 1998

Letter

- 881 Method for the characterization of hologram processing
I. Bányász, A. Beléndez, I. Pascual and A. Fimia

Papers

- 889 Depth profiling of weakly absorbing samples by the crossed-beam photothermal deflection technique
B.-C. Li and S.-Y. Zhang
- 903 Ellipsometric parameters and reflectances of thin films with slightly rough boundaries
D. Franta and I. Ohlídal

- 935 Fabrication method of ion-exchanged waveguide integrated elements in shallow buried single-mode planar guides
J. Liñares and E. López-Lago
- 945 The evolution of a micromaser cavity field without the rotating-wave approximation
Z. Liu, L. Zeng and S. Zhu
- 955 On the algebraic characterization of a Mueller matrix in polarization optics. I. Identifying a Mueller matrix from its N matrix
A. V. Gopala Rao, K. S. Mallesh and Sudha
- 989 On the algebraic characterization of a Mueller matrix in polarization optics. II. Necessary and sufficient conditions for Jones-derived Mueller matrices
A. V. Gopala Rao, K. S. Mallesh and Sudha
- 1001 The Majorana representation of polarization, and the Berry phase of light
J. H. Hannay
- 1009 Cubic optical nonlinearities of metals in the vicinity of the melting point
P. J. Bennett, S. Dhanjal, Y. P. Svirko and N. I. Zheludev
- 1019 Azimuth-angle-dependent reflectivity data from metallic gratings
A. P. Hibbins, J. R. Sambles and C. R. Lawrence
- 1029 Interferometric monitoring of surface shaping processes in micro-lenses produced by melting photoresist
T. Mancebo and S. Bará
- 1039 An experimental test of the path dependency of Pancharatnam's geometric phase
H. Schmitzer, S. Klein and W. Dultz
- 1049 Field phase modulation and input phase and intensity dependence in a nonlinear second-order interaction
G. D'Aguanno, C. Sibilía, E. Fazio, E. Ferrari and M. Bertolotti
- 1067 Field damping in a squeezed thermal reservoir
H. T. Dung, A. Joshi and L. Knöll
- 1085 Superposition of displaced number states and interference effects
C. M. A. Dantas, J. R. Queiroz and B. Baseia

No. 6 June 1998

Foreword

- 1097 Special Issue: Thirteenth National Quantum Electronics Conference

Papers

- 1099 Nonlinear competing processes in multifrequency Raman generation
G. S. McDonald, G. H. C. New, Y.-M. Chan, L. L. Losev and A. P. Lutsenko
- 1111 Non-paraxial solitons
P. Chamorro-Posada, G. S. McDonald and G. H. C. New

- 1123 Investigation of vacuum ultraviolet generation in a resonant four-wave mixing scheme in krypton with electromagnetically induced transparency
C. Dorman, J. P. Marangos and J. C. Petch
- 1137 Stimulated Brillouin scattering with an infrared optical parametric oscillator
K. D. Ridley
- 1147 Improved photon-number squeezing in light-emitting diodes
F. Wölfl, G.-M. Schucan, A. M. Fox and J. F. Ryan
- 1155 Robust quantum state engineering using coherent states on a truncated von Neumann lattice
L. K. Stergioulas and A. Vourdas
- 1163 Dynamics of orientationally enhanced polymeric photorefractive composites
K. S. West, J. D. Shalos, D. P. West, T. A. King and R. D. Blackburn
- 1175 Microwave-induced quantum transitions in a superconducting quantum interference device
R. Whiteman, T. D. Clark, R. J. Prance, H. Prance, V. Schöllmann, J. F. Ralph, M. Everitt and J. Diggins
- 1185 High average power blue generation from a copper vapour laser pumped titanium sapphire laser
D. W. Coutts, W. J. Wadsworth and C. E. Webb
- 1199 Control of periodic orbits and steady states in external cavity laser diodes using impulsive electronic feedback
V. Naumenko, N. A. Loiko, S. I. Turovets, P. S. Spencer and K. A. Shore
- 1211 The influence of gain compression on picosecond optical pulses in semiconductor optical amplifiers
J. M. Tang, P. S. Spencer and K. A. Shore
- 1219 Self-consistent analysis of the dc modulation response of unipolar semiconductor lasers
C. Y. L. Cheung and K. A. Shore
- 1231 The production of multiringed Laguerre–Gaussian modes by computer-generated holograms
J. Arlt, K. Dholakia, L. Allen and M. J. Padgett
- 1239 All-optical synchronization of self-pulsating laser diodes with frequency multiplication and division
A. Egan, M. Harley-Stead, P. Rees, S. Lynch, P. McEvoy, J. O’Gorman and J. Hegarty
- 1249 Pulsed single-mode laser in four-arm grazing incidence cavity
D. J. Binks, D. K. Ko, L. A. W. Gloster and T. A. King
- 1259 High performance solid-state dye laser based on perlene-orange-doped polycom glass
M. D. Rahn and T. A. King
- 1269 Theoretical comparison of Er^{3+} -doped crystal lasers
M. Tikerpae, S. D. Jackson and T. A. King

- 1285 Femtosecond optical parametric oscillators based on periodically poled lithium niobate**
Z. E. Penman, C. McGowan, P. Loza-Alvarez, D. T. Reid, M. Ebrahimzadeh, W. Sibbett and D. H. Jundt
- 1295 Strategies for discriminating between non-orthogonal quantum states**
A. Chefles and S. M. Barnett
- 1303 Topological equivalence in the theory of trapped ions**
C. Baxter and R. Loudon

No. 7 July 1998

Foreword

- 1309 Special Issue: Diffractive Optics**

Papers

- 1313 Reformulation of the Fourier modal method for surface-relief gratings made with anisotropic materials**
Lifeng Li
- 1335 Analysis of binary diffraction gratings: comparison of different approaches**
I. Richter, Z. Ryzí and P. Fiala
- 1357 Computation of the near-field pattern with the coupled-wave method for transverse magnetic polarization**
P. Lalanne and M. P. Jurek
- 1375 Shift and shape of grating diffracted beams**
R. Güther and B. H. Kleemann
- 1395 Rigorous diffraction theory applied to microlenses**
P. Blattner and H. P. Herzig
- 1405 Zonal diffraction efficiencies and imaging of micro-Fresnel lenses**
B. H. Kleemann and R. Güther
- 1421 Calculation of the aberration spot: improved numerical algorithm**
M. Lewkowicz, J. Nowak and M. Zajac
- 1437 On-axis phase-only computer-generated holograms based on a minimal etching process**
U. Levy, D. Mendlovic and Z. Zalevsky
- 1451 On pixel-oriented structure parametrization for design of diffractive elements**
H. Aagedal and F. Wyrowski
- 1465 Recording of holographic diffraction gratings in photopolymers: theoretical modelling and real-time monitoring of grating growth**
I. Aubrecht, M. Miler and I. Koudela
- 1479 Recording of relief structures in amorphous hydrogenated carbon (a-C:H) films for infrared diffractive optics**
L. L. Soares, C. R. A. Lima, L. Cescato, M. A. R. Alves and E. S. Braga
- 1487 High-efficiency binary phase-transmission-grating using e-beam lithography**
T. Glaser, S. Schröter, R. Pöhlmann, H.-J. Fuchs and H. Bartelt

- 1495** Light field decomposition in angular harmonics by means of diffractive optics
V. V. Kotlyar, S. N. Khonina and V. A. Soifer
- 1507** Diffractive optical element based sensor for surface quality of pharmaceutical tablets
R. Silvennoinen, K.-E. Peiponen, M. Sorjonen, J. Ketolainen, E. Suihko and P. Paronen
- 1513** Diffractive light attenuators with variable transmission
A. G. Poleshchuk
- 1523** Use of a multilayer dielectric diffraction grating as the resonator mirror of a neodymium-doped yttrium aluminium garnet laser
H.-J. Rostalski, J. Guhr, B. H. Kleeman, J. Elschner, G. Schmidt, M. Ferstl, E. Pawlowski, R. Steingrüber, G. Bostanjoglo and R. Motzkus
- 1537** Beam propagation in an active planar waveguide with an angled Bragg grating (α laser)
R. Güther

No. 8 August 1998

Apology

Preface

Michael Vaughan

Special issue papers

- 1549** Coherent lidar at low signal powers: basic considerations on optical heterodyning
P. J. Winzer and W. R. Leeb
- 1557** Coherent detection of enhanced back-scatter from rough surfaces and particle suspensions
M. C. Pitter, E. Jakeman and M. Harris
- 1567** The role of laser coherence length in continuous-wave coherent laser radar
M. Harris, G. N. Pearson, J. M. Vaughan, D. Letalick and C. Karlsson
- 1583** The impact of atmospheric stratification on a space-borne Doppler wind lidar
J. M. Vaughan, D. W. Brown and D. V. Willetts
- 1601** A high-performance CO₂ laser heterodyne detector operating at 250 K
C. T. Elliott, N. T. Gordon, D. J. Wilson, C. L. Jones, C. D. Maxey, N. E. Metcalfe and A. Best
- 1613** Hollow waveguide integrated optics: a novel approach to 10 μ m laser radar
R. M. Jenkins, R. W. J. Devereux and A. F. Blockley

Letters

- 1629** Fibre-as-phase-object approximation in light scattering experiments
A. N. Starodumov, L. A. Zenteno and B. S. Mendoza
- 1637** Refractive index variation measurements of fluids using common-path Zeeman interferometry
Yong Kee Kim, J. D. Trolinger, B. R. Reddy and R. B. Lal

Papers

- 1645** **Anisotropic conical scattering and isotropic scattering oscillation in Cu: KNSBN**
Feng Wang, Liren Liu and Xiaona Yan
- 1653** **Well characterized 10^{19} Wcm² operation of VULCAN—an ultra-high power Nd: glass laser**
C. N. Danson, J. Collier, D. Neely, L. J. Barzanti, A. Damerell, C. B. Edwards, M. H. R. Hutchinson, M. H. Key, P. A. Norreys, D. A. Pepler, I. N. Ross, P. F. Taday, W. T. Toner, M. Trentelman, F. N. Walsh, T. B. Winstone and R. W. W. Wyatt
- 1671** **Analytical formula for calculating the focal shift in apodized systems**
M. Martínez-Corral, C. J. Zapata-Rodríguez, P. Andrés and M. Kowalczyk
- 1681** **Theory for confocal and conventional microscopes imaging small dielectric scatterers**
P. Török, P. D. Higdon and T. Wilson
- 1699** **An open-systems approach to calculating time-dependent spectra**
Matti Havukainen and Stig Stenholm
- 1717** **Field oscillations in a micromaser with injected atomic coherence**
M. Hillery and Jozeg Škvarček
- 1725** **The transverse magnetic wave and the Brewster angle for a dielectric medium moving in an arbitrary direction**
Yao Xiong Huang
- 1735** **Determination of photon statistics and density matrix from double homodyne detection measurements**
Th. Richter
- 1751** **Inactive frequency bands in photonic crystals**
V. Karathanos

Short Contribution

- 1759** **Lippmann photography or Lippmann holography?**
P. Hariharan
- 1763** **Book reviews**
- 1766** **Errata**

No. 9 September 1998*Letter*

- 1767** **Measuring dispersion between two modes of an optical fibre using time-domain and spectral-domain low-coherence interferometry**
P. Hlubina

Papers

- 1775** **Wavelet analysis of short harmonics generated in presence of a two colour laser field**
S. de Luca and E. Fiordilino
- 1785** **Numerical aperture for graded-index tapered planar waveguides with a hyperbolic secant refractive index profile**
C. Gómez-Reino, C. Bao, M. V. Perez and Y. Wang

- 1797 Performance analysis of optical imaging systems based on the fractional Fourier transform
S. Granieri, E. E. Sicre and W. D. Furlan
- 1809 Phase-shifting interferometry using a two-dimensional regularized phase-tracking technique
M. Servin, R. Rodriguez-Vera, J. L. Marroquin and D. Malacara
- 1821 Modal method for scattering by arbitrarily shaped multivalued surfaces
D. C. Skigin and R. A. Depine
- 1845 Wave dislocation reactions in non-paraxial Gaussian beams
M. V. Berry
- 1859 Two-level atom in a squeezed vacuum with finite bandwidth
R. Tanaś, Z. Ficek, A. Messikh and T. El-Shahat
- 1885 Spatial self-filtering using photorefractive and liquid crystals
E. U. Wagemann and H.-J. Tiziani
- 1899 Fraunhofer and Fresnel field distributions from the LP_{01} mode in a micro-sized hollow optical fibre
W. Wang, J. Yin, W. Gao, Y. Zhu and Y. Wang
- 1913 Fabry-Pérot and ring cavity configurations and transverse optical patterns
M. Möller, L. M. Hoffer, G. L. Lippi, T. Ackemann, A. Gahl and W. Lange
- 1927 Takens-Bogdanov bifurcation in a two-component nonlinear optical system with diffractive feedback
E. V. Degtiarev and V. Wataghin
- 1943 Optical tweezers with increased axial trapping efficiency
N. B. Simpson, D. McGloin, K. Dholakia, L. Allen and M. J. Padgett
- 1951 Suppression of undamped oscillations in erbium-doped fibre lasers with intensity-dependent losses
A. Kellou, K. Aït-Ameur and F. Sanchez
- 1957 Model of the nonlinear operation of a laser with a Gaussian mirror
P. Witoński, P. Szczepański and A. Kujawski
- 1975 Large in-plane displacement measurement in dual-beam speckle interferometry using temporal phase measurement
C. Joenathan, B. Franze, P. Haible and H. J. Tiziani

No. 10 October 1998

Letters

- 1985 High-efficiency silver-halide sensitized gelatin holograms with low absorption and scatter
A. Beléndez, C. Neipp, M. Flores and I. Pascual
- 1993 All-solid-state injection-seeded tunable ultraviolet laser
M. A. Dubinskii, K. L. Schepler, R. Yu. Abdulsabirov and S. L. Korableva

Papers

- 1999 Near field and far field of elegant Hermite–Gaussian and Laguerre–Gaussian modes
A. Saghafi and C. J. R. Sheppard
- 2011 Automatic spatial fringe analysis method for two-dimensional fringes image including phase discontinuities by obstructions
Y. Arai, I. Ishihara and S. Yokozeki
- 2025 Superconducting Josephson junction of finite capacitance in a lossless cavity: a plausible two-level system with a giant coupling constant
Y. B. Xie
- 2039 Variational approach for walking solitons in birefringent fibres
N. J. Rodríguez-Fernández and J. M. Soto-Crespo
- 2051 Surface plasmon-polariton study of the optical dielectric function of titanium nitride
A. P. Hibbins, J. R. Sambles and C. R. Lawrence
- 2063 Method of solving triplets consisting of a singlet and air-spaced doublet with given primary aberrations
C.-H. Chen, S.-G. Shiue and M.-H. Lu
- 2085 Pulse propagation effects in magnetoactive bulk direct-gap semiconductors
S. Jaswani, P. Sen and P. K. Sen
- 2097 Free-space diffraction and the fractional Fourier transform
C. J. R. Sheppard
- 2105 Quantum trajectory theory for a two-level atom in a squeezed vacuum field with non-radiative dephasing
U. Akram and M. R. B. Wahiddin
- 2117 The relation between light diffraction and the fractional Fourier transform
D. Dragoman
- 2125 Guided-type second harmonic generation in ion implanted $\text{MgO}:\text{LiNbO}_3$
N. Hamelin and Y. T. Chow
- 2131 Laser-field-induced quantum beats in correlations in cascade emission
A. K. Patnaik and G. S. Agarwal
- 2139 Low-threshold, high-efficiency, linearly polarized $1.338\mu\text{m}$ Nd:S-VAP laser and its frequency doubling
C. Wang, N. Hamelin, Y. T. Chow, X. Meng and Z. Shao
- 2147 Impurity modes in one-dimensional photonic crystals—analytic approach
Y.-C. Tsai, K. W.-K. Shung and S.-C. Gou
- 2159 Characterization of trapping force in the presence of spherical aberration
P. C. Ke and M. Gu
- 2169 Waveguide confinement of Cerenkov second-harmonic generation through a graded-index grating coupler: electromagnetic optimization
F. Montiel, M. Neviere and P. Peyrot

- 2187 **On geometric phase from pure projections**
R. Bhandari
- Short communications*
- 2197 **Photorefractive two-wave mixing and the Lambert W function**
H. Rehn
- 2201 **Negative binomial states of the quantized radiation field**
S. M. Barnett

No. 11 November 1998

- 2207 **Scattering analysis of conducting axisymmetric particles using the extended boundary condition method with discrete sources**
T. Wriedt and A. Doicu
- 2217 **Photonic de Broglie wave interferometers**
S. M. Barnett, N. Imoto and B. Huttner
- 2233 **Multiphoton interference effects at a beam splitter**
A. Kuzmich, D. Branning, L. Mandel and I. A. Walmsley
- 2245 **Fringe localization in interferometers illuminated by a succession of incoherent line sources**
J. M. Simon, M. C. Simon, R. M. Echarri and M. T. Garea
- 2255 **Enhanced nonlinear optical response of Cantor-like and Fibonacci-like quasiperiodic structures**
C. Sibilia, F. Tropea and M. Bertolotti
- 2269 **Phase properties of the asymmetric nonlinear coupler**
L. Mišta Jr, J. Řeháček and J. Peřina
- 2281 **Excitation of eigenmodes at uniaxial crystal-metal-isotropic films**
M. L. Gigli and R. A. Depine
- 2301 **Restoring images using a feed-forward neural network and the gradient adaptive learning rate algorithm**
A. Y. E. Atta and H. M. Haarb
- 2315 **Photon-echo technique for reducing the decoherence of a quantum bit**
M. Ban
- 2327 **A numerical study of the statistics of penetration depth of photons re-emitted from irradiated media**
G. H. Weiss and J. E. Kiefer
- 2339 **Optimum signal polarization in two-wave mixing with incoherent erasure of the fanning process**
M. B. Danilov, M. Laurito and A. Pecchia
- 2345 **A theoretical model for noise gratings recorded in acrylamide photopolymer materials used in real-time holography**
L. Carretero, S. Blaya, R. Mallavia, R. F. Madrigal and A. Fimia
- 2355 **Rotating optical fields: experimental demonstration with diffractive optics**
P. Pääkkönen, J. Lautanen, M. Honkanen, M. Kuittinen, J. Turunen, S. N. Khonina, V. V. Kotlyar, V. A. Soifer and A. T. Friberg

- 2371 **A phase-conjugate Twyman–Green interferometer with increased sensitivity for laser beam collimation**
J. S. Darlin, M. P. Kothiyal and R. S. Sirohi
- 2379 **Direct focusing modifications of elliptical Gaussian beam by non-circular apertures**
Sheng-Hsiung Chan, Shin-Gwo Shiue and Mao-Hong Lu
- 2389 **Can sheared surfaces emit light?**
J. B. Pendry
- 2409 **A geometric phase in optical multilayers**
J.-M. Vigoureux and D. V. Labeke
- 2417 **Non-redundant apertures for optical interferometric systems: maximization of the number of elements**
L. E. Kopilovich

No. 12 December 1998

Letters

- 2425 **Fibre-optic photon-number squeezing in the normal group-velocity dispersion regime**
F. König, S. Spälter, I. L. Shumay, A. Sizmann, Th. Fauster and G. Leuchs
- 2433 **Effects of spontaneous emission interferences on population inversions of a V-type atom**
S.-Q. Gong, E. Paspalakis and P. L. Knight

Papers

- 2443 **Scanning methods for production of blazed relief gratings**
Z. Ryzi and P. Fiala
- 2451 **Investigations of spatial distributions of intensity of radiation reflected from thin films which are inhomogeneous over thickness**
J. Jaglarz and M. Nowak
- 2461 **Full *in-situ* characterization of spatial light modulators in an optical correlator. Filter adaptation to operating curves**
O. López-Coronado, I. Moreno, J. Campos and M. J. Yzuel
- 2473 **The phase evolution of a micromaser field without the rotating-wave approximation**
Z.-D. Liu, L. Zeng, S.-Y. Zhu and T. F. George
- 2487 **Nonspecular first-order effects in Kretschmann's configuration**
L. I. Perez and F. Ciocci
- 2503 **General scheme for paraxial ray tracing and aberration calculation in inhomogeneous media**
Y. Wang, J. Xiong, S. Zhang, C. Gomez-Reino, C. Bao and V. Perez
- 2513 **Observation of a stronger focus due to spherical aberration**
G. P. Karman, A. van Duijl and J. P. Woerdman
- 2519 **Trapping and Fock state generation in a two-photon micromaser**
M. Alexanian, S. Bose and L. Chow
- 2533 **Optimum signal profile in longitudinally pumped three-level amplifiers**
F. Sanchez, M. Brunel, C. Özkul and K. Aït-Ameur

- 2541 Pressure effects on the spectral line shape of broad-band degenerate four-wave mixing**
D. J. W. Walker, G. M. Lloyd, R. B. Williams, R. Bratfalean and P. Ewart
- 2551 Analysis of gain and noise performance of bidirectionally pumped Pr^{3+} -doped fluoride fibre amplifier configurations with unbalanced pumping**
J. A. Vallés, J. A. Lázaro, M. Hotoleanu, M. Karasek and E. Voiculescu
- 2561 Low-power two-wave mixing in dry methylene-blue-sensitized gelatin films**
T. Keinonen, S. Parkkonen and T. Jääskeläinen
- 2573 Optimal composition of an acrylamide and N,N' -methylenebisacrylamide holographic recording material**
S. Blaya, L. Carretero, A. Fimia, R. Mallavia, R. F. Madrigal, R. Sastre and F. Amat-Guerri
- 2585 Surface plasmon-polariton study of the optical dielectric function of zinc**
D. J. Nash and J. R. Sambles
- 2597 Analysis of dark spot formation in absorbing liquid media**
D. Yu, W. Lu, R. G. Harrison and N. N. Rosanov
- 2607 Corrigendum**
- 2609 Index of authors**

Aims and Scope

The *Journal of Modern Optics* aims to publish original contributions to optical knowledge from educational institutions, government establishments and industrial R&D groups world-wide. The whole field of classical and quantum optics is covered. Papers may deal with the applications of the fundamentals of modern optics, considering both experimental and theoretical aspects of contemporary research, for example

Diffraction

Free and guided propagation

Interference

Optical coherence

Polarization

Scattering

Photon statistics

Quantum optics

Lasers

Nonlinear optics

Bistability

Phase conjugation

Harmonic generation

Image formation

Image evaluation

Image processing

Holography

Speckle

Optical materials

Thin films and multilayer coatings

Fibre optics and sensors

Integrated optics

Electro-optics

Physiological optics

Colorimetry

Optical metrology

Optical design and techniques

Optical instrumentation

Optical production technology

Optical system testing

Papers are accepted for consideration on condition that:

- the work is original;
- you own the copyright;
- you have secured the permission of all named co-authors, and have agreed the order of names for publication;
- you have secured all permissions for the reproduction of original or derived material from a copyright source;
- the paper has not been previously published;
- the paper is not under consideration elsewhere;
- you will transfer copyright to Taylor & Francis Ltd if the paper is accepted for publication.

There are no page charges in the *Journal of Modern Optics*.

Fifty complimentary copies of your paper will be sent to the principal or sole author of articles; book reviewers will be sent three copies free of charge. Larger quantities may be ordered at a special discount price. An order form will accompany the proof, which must be completed and returned, irrespective of whether you require additional copies.

Books for, or offers to, review should be sent to the Editor, via the editorial office.

Editorial office

Professor P. L. Knight (editor), Journal of Modern Optics, Blackett Laboratory, Imperial College, London SW7 2BZ, UK. Tel: (171) 594 7727.

Professor R. W. Boyd (North American Editor), The Institute of Optics, University of Rochester, Rochester, NY 14627, USA. Tel: (716) 275 2329.

Submitting a paper to the *Journal of Modern Optics*

Before preparing your submission, please contact Taylor & Francis for a complete style guide, or visit our web page; contact details are given below.

Papers for consideration should be sent to the appropriate Editor, at the editorial office, address given below.
